

Vexira Antivirus for Windows Desktop / Workstation

Vexira® Antivirus is a high performance end-point malware, spyware and virus protection solution for desktops, workstations, laptops and netbooks on a corporate network. It is a Virus Bulletin **VB100** award winning product ensuring **world-class malware, spyware and virus protection**. With Vexira Antivirus all executable files are scanned for malware, spyware and viruses when created, launched or modified. Individual files, directories and disks (local, network or attached) can also be scanned. Also included is integrated Microsoft® Outlook and Office malware, spyware and virus protection. Optionally Vexira Antivirus Desktop / Workstation edition can be integrated in to the **Vexira Central Management Solution** for complete remote deployment, management and reporting.

- ✓ Stops malware, spyware, viruses
- ✓ High performance scanning
- ✓ Intelligent protection and defense
- ✓ Easy to use and configure
- ✓ Can be fully managed and deployed

Virus Bulletin VB100 Award

Vexira Antivirus is a Virus Bulletin VB100 Award winning product. It is positioned among the leading malware, spyware and virus protection products in the world. The Virus Bulletin testing is the most stringent and respected malware product testing bodies. To be awarded a VB100 award the product must **detect all the "In The Wild" viruses during both on-demand and on-access scanning** and additionally produce no false positive alerts when malware scanning a set on known clean files using just its default settings.

Automatic virus, spyware and malware signature updates and version control

Vexira Antivirus can be used in either stand-alone mode or integrated within the [Vexira Central Management Solution](#) to obtain the latest malware, spyware and virus signature updates that have been deployed within a network as well as the latest desktop versions. Full automatic and on-demand updating and version upgrading is supported.

Configurable malware, spyware and virus protection policy enforcement

Malware, spyware and virus protection configurations can be locked down to ensure consistent usage and configuration.

Simple installation and deployment

The Vexira Antivirus installation wizard can install the virus protection by answering a few easy questions. Optional integration into Vexira Central Management Solution can also be used for installation across a network.

Easy operation

Vexira Antivirus has an intuitive user interface that allows the malware, spyware and virus protection options to be configured to fit the unique needs of an individual or organization. Included is a simple, well explained, help system with direct links to various areas of Central Command's website in case any further information or instructions are needed.

Complete coverage

Vexira Antivirus virus scans Internet downloads, e-mail attachments, network drives, shared files, attached hard disks, ZIP drives, tape backups and USB drives for malware, spyware and viruses.
